

# Achmad Safruddin

## Software Engineer | Frontend & Mobile Engineer

Central Java, Indonesia | (+62) 813-9379-1414 | asafruddin022@gmail.com | LinkedIn: achmad-safruddin | GitHub: asafruddin

### PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience delivering production-ready web and mobile applications across fintech, e-commerce, healthcare, point-of-sale, and client-based digital products. Strong expertise in React.js, Next.js, React Native, Flutter, TypeScript, JavaScript, and Dart, with hands-on experience building scalable user interfaces, cross-platform mobile applications, API-integrated workflows, wallet and card flows, and release-ready products for Android, iOS, and web platforms.

Experienced in developing high-performance frontend systems, maintaining mobile applications, resolving critical production issues, managing app releases, collaborating with backend and product teams, and supporting end-to-end software delivery. Proven ability to work in remote teams, mentor junior developers, improve application stability, and deliver business-focused technical solutions.

### TECHNICAL SKILLS

**Frontend Development:** React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Responsive Web Design

**Mobile Development:** Flutter, Dart, React Native, Android, iOS, Cross-Platform Development

**State Management:** Redux, Provider, Context API

**API & Integration:** REST API Integration, Third-Party SDK Integration, Real-Time Communication Features, Wallet & Transaction Flows, Crypto Swap Flows

**Tools & Platforms:** Git, GitHub, CI/CD, Jenkins, Google Play Console, Apple App Store Connect

**AI-Assisted Development:** ChatGPT, GitHub Copilot, Cursor - coding, debugging, testing, and technical documentation

**Software Practices:** Agile/Scrum, Code Review, Debugging, Performance Optimization, Production Support

**Domain Experience:** Fintech, Digital Wallet, Digital & Physical Cards, Crypto Swap, E-Commerce, Healthcare Technology, POS Systems, Vehicle Rental, Parking, Laundry Management

### PROFESSIONAL EXPERIENCE

#### Xcidic | Engineer

November 2023 - Present | Jakarta, Indonesia | Remote

- Engineered and maintained high-performance web applications using Next.js, React.js, TypeScript, and JavaScript for a platform serving millions of weekly users.
- Developed scalable and reusable frontend components to improve maintainability, user experience, and delivery speed.
- Contributed to Flutter-based fintech application delivery, including wallet, card, crypto swap, transfer reliability, bug fixing, and app release preparation.
- Integrated Amity to support real-time communication and collaboration features across the application.
- Diagnosed, prioritized, and resolved critical production issues, reducing reported high-impact bugs by 50% and improving platform stability.
- Developed features for a laundry management system, supporting operational workflows, service management, and business process automation.

#### PT. Mota Kasir Indonesia | Mobile Engineer

May 2025 - August 2025 | Remote

- Improved application stability across POS, Owner, and CRM products by diagnosing and resolving critical legacy issues.
- Maintained and enhanced Flutter-based mobile applications used for cashier, business management, and customer relationship workflows.
- Managed deployment processes for multiple Android applications through Google Play Console, ensuring release readiness and compliance with platform requirements.
- Collaborated with internal stakeholders to validate fixes, prepare releases, and support post-release product stability.

#### Freelance | Mobile Engineer

October 2023 - October 2024 | Remote

- Architected and led the development of a Flutter-based vehicle rental and parking application, completing approximately 90% of core product functionality.
- Designed scalable mobile application structures focused on usability, maintainability, and performance.
- Managed client communication, requirement clarification, and feedback analysis throughout the development lifecycle.
- Resolved approximately 60% of client change requests, including feature modifications, UI improvements, and workflow adjustments.

#### Majoo Teknologi Indonesia | Mobile Engineer

March 2022 - July 2023 | Jakarta / Malang, Indonesia | Remote

- Developed and released a production cashier application that achieved more than 100,000 downloads on the Google Play Store.
- Built and maintained Flutter-based mobile features for cashier and business operational workflows.
- Implemented post-launch enhancements and resolved production issues to improve product usability and application stability.
- Supported CI/CD implementation using Jenkins to streamline build and release processes.
- Collaborated with product, QA, backend, and mobile teams to deliver reliable features for business users.

#### Media Sarana Akses (GMEDIA) | Mobile Engineer

February 2020 - February 2022 | Yogyakarta, Indonesia

- Delivered approximately 70% of the company client mobile application portfolio, successfully releasing products to Google Play Store and Apple App Store.
- Led a mobile development team for 6 months, coordinating task execution, technical direction, and delivery timelines.
- Achieved a 100% success rate in meeting assigned project deadlines during team leadership responsibilities.
- Developed cross-platform mobile applications using Flutter and React Native based on client requirements.
- Mentored interns on mobile development practices, application architecture, debugging, and agile delivery workflows.

### SELECTED PROJECT EXPERIENCE

#### Fusion Pay | Fintech, Wallet & Crypto Swap Application

June 2026 - July 1, 2026 | Remote | Tech Stack: Flutter

- Contributed to the development of a fintech mobile application with wallet, digital card, physical card, same-chain crypto swap, and cross-chain crypto swap features.
- Developed and enhanced same-chain and cross-chain crypto swap flows, including transaction handling and user-facing swap interactions.
- Fixed major issues in the transfer feature, improving reliability and reducing failed or blocked user transaction flows.
- Resolved UI, performance, and stability bugs to improve application responsiveness and production readiness.

- Assisted with release preparation and delivery to the Apple App Store and Google Play Store.

### **Selected Freelance Project | E-Commerce Web & Healthcare Mobile Application Project**

*January 2026 - Present | Remote*

- Delivered and maintained frontend features for an e-commerce web application, supporting responsive user flows, product browsing, and business operations.
- Developed mobile application features for healthcare report workflows, including voice recording, transcription result handling, and structured medical report document generation.
- Built user interfaces and application flows that support healthcare professionals in converting recorded consultation data into organized report documents.
- Supported debugging, feature enhancement, and release preparation across web and mobile applications.

### **EDUCATION**

---

#### **Universitas Teknologi Yogyakarta | Bachelor of Computer Science**

*September 2016 - April 2021 | GPA: 3.9 / 4.0*

### **TARGET ROLES**

---

Frontend Engineer | React Developer | Next.js Developer | Mobile Engineer | React Native Developer | Flutter Developer | Fintech Mobile Developer | Web3/Crypto Mobile Developer | Software Engineer | Frontend Mobile Engineer
